

DARCO in Sports: Medical Tapes for injury prevention and post injury aftercare.

DARCO Standard Tape

Non-elastic Athletic Tape

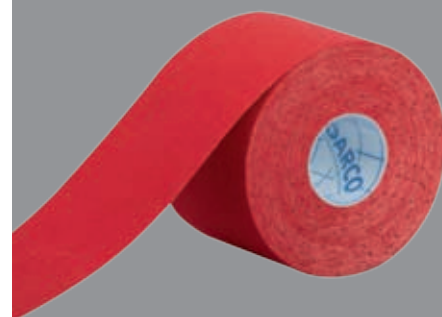

- > for treatment of muscular pain
- > for stabilization of joints and muscles
- > an alternative to braces

DARCO Underwrap

Cohesive Underwrap / Pre Wrap

- > skin-friendly
- > protective cover
- > for fixation of plasters and bandages
- > elastic and extra-thin material
- > cohesive, no fixation of ends necessary

DARCO Elastic Tape

Elastic Tape for Kinesiology Taping

- > for treatment of muscular pain
- > to improve performance by means of continuous stimulation
- > stimulates the blood circulation
- > elastic and stretchable up to 30–40 %

DARCO

Sport injuries – especially in the world of soccer, handball, tennis, volleyball and basketball – are often treated directly at the side of the playing field. However, both in amateur and professional sport it is becoming more common to take preventative measures against injury.

DARCO Elastic Tape

The DARCO Elastic Tape is an elastic sport and therapy tape for kinesiology taping. This technique is used world wide in many sporting fields as successfully as with patients in a physiotherapeutic setting. The DARCO Elastic Tape is designed to the same thickness and elasticity of the epidermis (outer layer) of the skin. It allows longitudinal stretch of 30–40% of its resting length.

The tape is used in treatment of muscle, fascia and tendon symptoms and for performance enhancement by way of continuous receptor stimulation. The natural healing process is enhanced due to improved circulation in the taped areas.

The DARCO Elastic Tapes are currently available in red, blue, yellow, black and beige.

DARCO Standard Tape

The DARCO Standard Tape is a non-elastic tape used to stabilize joints and muscles.

Use of this tape is known the world over. In sports-related applications in particular, it provides an excellent alternative to braces, since it lends itself to individual adaptation to the situation, i.e. to the sport and the level of risk of injury involved as well as to the physiognomy of the wearer.

DARCO Underwrap

The DARCO Underwrap is a lengthwise elastic and very thin woven adhesive bandage. This Pre wrap is primarily used for compression treatment as well as for preventive skin protection under an athletic tape. Moreover, it is meant for fixing treatment supporting aids such as ice for cooling.

The underwrap is made of 60% polyamide and 40% cotton breatheably interwoven for a specifically comfortable fit.

The material contains natural rubber latex.

Item-No.	Colour	Length	Width
----------	--------	--------	-------

DKT-R	Red	5 m	5 cm
DKT-B	Blue	5 m	5 cm
DKT-G	Yellow	5 m	5 cm
DKT-S	Black	5 m	5 cm
DKT-H	Beige	5 m	5 cm

DST	White	10 m	3.8 cm
-----	-------	------	--------

DUW-6	Beige	4 m	6 cm
DUW-8	Beige	4 m	8 cm
DUW-20	Beige	20 m	8 cm
